SAFETY, HEALTH, ENVIRONMENT AND FIRE (SHEF) AT
THE VINTAGE SPORTS CAR CLUB (VSCC)
AND DURING VSCC EVENTS

The VSCC Policy Statement

The Directors and trustees of The Vintage Sports-Car Club (VSCC or The Club) recognise and wholeheartedly accept their moral and legal obligations and responsibilities with regard to health, safety and the environment.

It is the Policy of the VSCC to operate in a positive culture of safety, health and environmental protection throughout its entire business and sporting activities. To this end the Club will coordinate all relevant activities under the collective heading of Safety, Health, Environment and Fire or 'SHEF'.

It is the policy of the VSCC to take all reasonably practicable steps to:

- Provide adequate control of the health, safety and environmental risks arising from our activities;
- Consult with our employees on matters affecting their health and safety;
- Provide and maintain safe plant and equipment;
- Ensure safe handling and use of substances;
- Provide information, instruction and supervision of employees;
- Ensure all employees are competent to do their tasks, and to give them adequate training;
- Prevent accidents and cases of work-related ill health;
- Maintain safe and healthy working conditions;
- Protect the health and safety of others who may be affected by our activities;
- Deal with waste and pollution in an environmentally responsible manner;
- Review and revise this policy as necessary at regular intervals.

In pursuance of this policy the Club will progressively identify all hazards, assess the risks and take measures to reduce risk. Motor sport is spectacular and exciting, providing enjoyment to competitors and spectators alike but there are many aspects of the sport which carry inherent risks. These risks cannot be totally eliminated and emphasis must therefore be placed on controlling the risks through effective risk management systems. The purpose of such Risk Management will be elimination of the risk where possible or reduction of the risks So Far As is Reasonably Practicable (SFARP) where it cannot.
